ABOUT ME

Know Me More

I'm a software developer and technical lead focused on building dependable digital products and engineering workflows that scale. Over the last 8+ years, I've worked across Python, Django, JavaScript, REST APIs, MySQL, cloud deployment, and agile delivery models.

My work has supported banking, healthcare, automotive, and e-commerce teams, where I've translated business challenges into reliable technical solutions, improved delivery quality, and mentored engineers toward cleaner, faster development.

INDUSTRIES

WHAT I DO

Services

01

Web Development

Modern, scalable web applications built with Python, Django, JavaScript, and maintainable architecture.

02

Technical Leadership

Team mentoring, sprint planning, architecture guidance, and delivery oversight for complex product work.

03

System Design

Clean technical design and product-aligned engineering decisions that improve performance and reduce complexity.

04

Automation

Workflow automation and CI/CD practices to improve deployment reliability, speed, and quality across products.

05

API Integration

Integration of business systems, third-party APIs, and data flows with secure, maintainable implementations.

06

Product Delivery

End-to-end implementation from requirement discovery to test, deployment, and support after launch.

SUMMARY

Resume

2024 - PRESENT

Technical Lead

Wipro Limited

Leading delivery for Ford Motors ADAS Stability work, coordinating architecture, QA, and sprint execution.

2021 - 2023

Associate Consultant

Capgemini / TSI

Contributed to Q2 online banking platform enhancements and delivered multiple product improvements in agile teams.

2023 - 2024

Project Lead

Taaffeite Technologies

Owned project lifecycle management and built Python Django solutions for forecasting and operational tooling.

2020 - 2021

Analysis Engineer

EASi Allegis

Built automation tools for structural analysis workflows and reduced manual processing time for engineering teams.

2019

Software Developer

Zoondia Pvt Ltd

Built and delivered customer-facing web applications and platform features for healthcare, sports, and community-focused products.

2017 - 2019

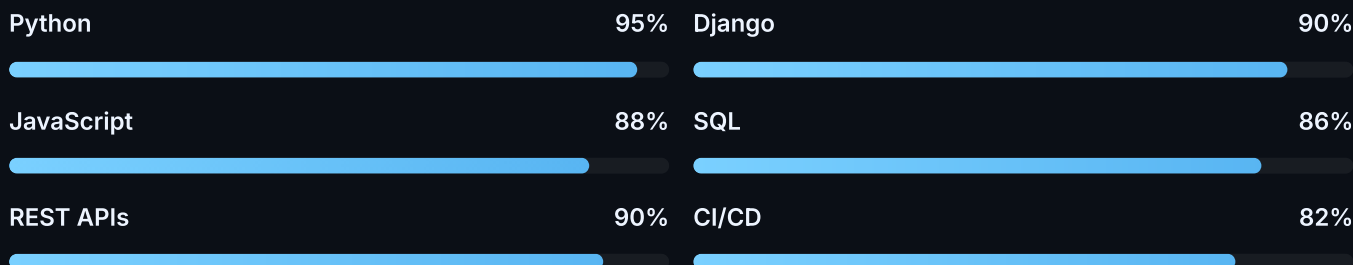

Software Developer

Veristics Network Pvt Ltd

Worked on web application development, implementation of product features, and collaboration across frontend and backend deliverables.

MY SKILLS

Core strengths

PORTFOLIO

Selected work

WEB APP

Load Capacity Tool

Python Django dashboard for workforce planning, forecasting, and delivery visibility.

AUTOMATION

Seam Width Updating Tool

Automation solution for engineering data updates and structural model processing workflows.

PLATFORM

MomsWell

Digital health platform supporting maternal guidance, clinical decision support, and patient education.

COMMUNITY

Sporty

Community sports platform with event, team, and competition management capabilities.

NETWORKING

Carvre Seven

Professional networking platform connecting logistics and business professionals.

PRODUCT

Q2 eBanking Features

Delivered enhancements for digital banking workflows with high reliability and client-focus.
